# SUPER ZAXXON™

## FABULOUS EXCITEMENT FABULOUS EARNINGS

SUPER ZAXXON offers the player tremendous new challenges and gameplay excitement never before experienced. The 3-dimensional-like isometric graphics places the player in remote controlled realism with his SUPER ZAXXON spacecraft.

The player ship soars through a portentous floating munitions fortress while battling hidden rockets, rotating turret guns, tracking parabolic antennas, super space ships and meser barriers.

The player spacecraft is lured into a tunnel of doom to fight against enemy ships, flying minelayers, self-destructing robot spacecraft and yet avoid the indestructible mines. The player spacecraft must also avoid the tunnels' low ceilings.

The ultimate space challenge is the bigger-than-life, fire-breathing Dragon who can destroy the player ship with a single breath of fire. The Dragon can only be destroyed by six direct hits into its fiery mouth by the player ship.

All gameplay action happens at supersonic speeds thus increasing the illusion of reality and the gusto of challenge.

SUPER ZAXXON features an extra-heavy duty flight control stick that has been "life-test" proven under the most rugged endurance tests possible.

Fantastic game graphics and colors distinguish SUPER ZAXXON from the rest of the pack. Repeat play is assured as income testing has already proved over and over again.

Further information can be obtained through your authorized SEGA distributor or the factory.

Table: 25-3/4" high, 26" deep, 35-3/4" wide 165 lbs.
